

Medical Coding: ICD-10-PCs

By BarCharts Inc

Barcharts, United States, 2012. Poster. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book. The health care industry is moving toward a major change in the code set, or language, used to report the reasons why a physician or health care professional provided care to a patient. Since 1978, the industry has used codes from ICD-9-CM, volume 3, to report the procedures, services, and treatments provided to inpatients in acute care facilities. Within the next few years, the transition will be made to ICD-10-PCS. The transition from ICD-9-CM, volume 3, to ICD-10-PCS will only affect those health information management professionals (and those getting ready to enter this profession) working on hospital inpatient procedure coding, but it will require even the most seasoned professionals to learn how to accurately report what has been provided to patients. With the use of tabular examples and color-coded text, this QuickStudy(r) guide helps make the transition smoother and promote better understanding and greater comfort with the new code set.
