EAE Aug 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - La diabetes mellitus es una de las enfermedades crónico-degenerativas de mayor incidencia a nivel mundial. Actualmente existen más de 346 millones de personas con diabetes en todo el mundo. La adherencia al tratamiento, definida por la Organización Mundial de la Salud como el grado en el que el comportamiento de una persona, se corresponde con las recomendaciones acordadas con un prestador de servicios sanitarios, es reconocida como uno de los problemas más importantes en las enfermedades crónicas, que hacen descender la eficacia y la eficiencia de los tratamientos. En la bibliografía internacional, se mencionan diversos factores que influyen en el apego o adherencia al tratamiento, tales como: socio demográficos, creencias del paciente, tipo de enfermedad, tipo de tratamiento, y la relación médico paciente, de todos ellos, el último es el factor con el potencial predictivo más fuerte. En la actualidad el médico es identificado como un prestador de servicios y el paciente como un usuario, esta relación responde a las necesidades de un mercado que vulnera los lazos afectivos que tradicionalmente han caracterizado a los vínculos entre el médico y el enfermo. 76 pp. Spanisch.
