

Proceedings of the Royal Philosophical Society of Glasgow Volume 4

By Royal Philosophical Glasgow

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 154 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1860 Excerpt: . . . due to the ingenuity of Dr. H. Lloyd of Dublin. The total force is estimated in numbers, the unit being 1 grain in weight, 1 in time, and 1 foot in space; or the force is such as in 1 would generate in 1 grain a velocity of 1 foot--just as the force of gravity is 32J, though in the first second IS-fa feet is the space passed over. Estimated thus, the force at the point of maximum intensity in Canada is 1421; at Toronto, 13896; at Greenwich, 10-388. In the southern hemisphere, it is 15600--the point of maximum intensity there best ascertained being about lat. 00 S. , long. 135 E. Another intensity pole is in lat. 20 S. , lon. 36 W. These four foci or intensity points are constantly changing their positions--the two northern shifting eastwards, and the two southern westwards; the weaker,...
