By United States. Federal Highway

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Original publisher: Washington, DC : The Administration, 2001 OCLC Number: (OCoLC)46961675 Subject: Express highways -- United States. Excerpt: . . . The two lowest rated attributes in 2000 were maintenance response time and traffic flow. Satisfaction with maintenance response time increased slightly, while satisfaction with traffic flow decreased. Fewer than half of highway travelers said they were satisfied with traffic flow, and only slightly more than half said they were satisfied with maintenance response time. For most attributes of COMPARISON OF SATISFACTION WITH ATTRIBUTES OF MAJOR HIGHWAYS (percent) major highways, travelers Visual appeal are more satisfied than Safety they were five years ago. Bridge conditions Travel amenities Pavement conditions Work zones Data not collected in 1995 Maintenance response times Traffic flow 2000 1995 20 40 60 80 Satisfied and Very Satisfied Responses Shown MF4 Sources: InfrastructureSurvey (2000) NQI National Highway User Survey (1995) Respondents expressed LARGEST SPECIFIC INCREASES IN SATISFACTION increased satisfaction WITH ATTRIBUTES OF MAJOR HIGHWAYS since 1995 with a Safety Bridge conditions number of major Hazard warning signs Visual appearance highway attributes. Lane width Durability Pavement marking Smoothness...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
